

YouTube – new supervised experience (beta version)

YouTube have created a new 'supervised' experience for children who perhaps are ready to explore more YouTube (YouTube Kids is still for younger children) but are not old enough to use YouTube (you should be over 13 years of age). This new experience is managed by you by creating a supervised Google Account linking to your child's account.

The supervised experience is still in beta version. It offers three content settings which are as follows:

- **Explore:** For children ready to explore content on YouTube, this setting will include content generally suitable for ages 9+.
- **Explore More:** Content generally suitable for viewers ages 13+, this setting will include more content as well as live streams.
- **Most of YouTube:** This setting will contain almost all YouTube content (except age-restricted content) so it *will* include sensitive topics that may only be appropriate for older teens.

Whilst YouTube have systems in place to block inappropriate content, no system is perfect so your child may still see something unsuitable. Talk to your child about how to stay safe online and what to do if they do come across anything unsuitable (they should talk to a trusted adult). There are reporting mechanisms within YouTube so make sure you and your child know how to report anything inappropriate.

YouTube, along with several partner

Your Digital footprint

What is a Digital Footprint?

A Digital Footprint is any information that is available online about

Gaming apps with adult themes you should know about

This article also includes tips to help you:

Screen

What is screen time?

It is the amount of time that we spend on a phone, computer, watching television or on a games console. Often, we worry about how much screen time our children are having and unfortunately, there is a lack of research to determine how much screen time our children should have. Following guidance released in 2019 by the Royal College of Paediatrics and Child Health (RCPCH), Professor Russell Viner, President of RCPCH suggests:

“that parents make decisions about screen time based on their child’s development and health, and whether they are getting enough exercise and sleep. It remains a question of balance, as it is when screen use gets in the way or restricts other activities that a child’s well-being can be negatively impacted.”

What age can my child start social networking?

All social networks have age restrictions, it’s important to review these to check what your child is using is appropriate for them. Internet Matters provide further guidance here as well as listing the minimum age for many of the platforms we see being used:
